

Good afternoon Seth,

I wanted to drop you a quick thank you for all that you have done for my son Aren. Aren has had more trouble in school with peers, teachers and academics for as long as I can remember. I tried to encourage Aren to participate in after school activities as an incentive for better grades and also to try to help him with his social skills. Aren started the five star program with these things in mind during his 7th. grade year at Schmucker. WOW! The improvement in academics and his manners as well as the new outlook he took on life was amazing! Our family doctor was even quite impressed and gave Aren a break from trying to find a specialist to help Aren figure himself out!

Aren did well over the summer and has been the biggest help in several ways for me, although the last few weeks Aren has started to slip! The one thing that encourages him and makes his face light up with excitement is knowing that the five star program is again right around the corner! Aren made new friends at camp this summer with five star and has kept in touch with them. The opportunities and positive environment that five star has created for him has been a saving grace! I hate to imagine where we might be now if we had not discovered the program at school!

Just wanted to let you know that five star is a wonderful program that has helped keep our family in smiles and out of some of the stress we used to go through... Although Aren still has his moments, we know that five star is a positive program that leads young teens into a positive direction and gives the kids hope when otherwise they are extremely discouraged. Keep up the good work and we are anxious to begin your program again this year!

Thank you to all of you who represent the five star life for sharing it with our community and encouraging our youth! Don't stop!

Sincerely,

Michele Terhorst
